Vellore Institute of Technology, Bhopal
2025

CSE with Cybersecurity
GPA: 7.75/10

September 2021 – July

Durgapur Public School (CBSE)
XI-XII)
Percentage: 78%

June 2021 (Class

St. Michael's School (ICSE)
Percentage: 84%

June 2019 (Class X)

PRACTICAL EXPERIENCE

AI with Cybersecurity – SmartBridge

June 2023

Job-Title: Externship

- Conducted Nessus scans to identify XSS & SQL vulnerabilities, reducing false positives by 20% via Burp Suite verification
- Attacked and analyzed different targets and figured out the type of vulnerabilities present there in the website along with remediation methodologies.

1. Competed in KPMG CTF 2024, WiCys CTF 2024, and TryHackMe HackInfinity 2025

2. Hands on Experience with HackTheBox Labs as well as HTB Academy ([Link](#))

SKILLS

- Programming:** JAVA, SQL, Python.
- Protocols:** NIST Framework, OWASP top 10, TCP/IP.
- Cybersecurity Tools:** Burp Suite, Nessus, Wireshark, Postman
- Cloud/Technologies:** AWS(VPC and IAM), Docker, Bare Metal.
- Soft Skills:** Teamwork, collaborative, problem-solving

PROJECTS

Blockchain Development

Decentralized Secure Cloud Storage

September 2024 - November 2024

- Built a secure file storage system using React.js, Node.js, and IPFS, integrating MetaMask for user authentication
- Implemented MetaMask authentication and Hardhat for contract testing, Tested smart contracts with Hardhat, ensuring reliable file hash storage
- Tech Stack:** React.Js, Node.Js, Solidity, Hardhat, IPFS, Smart Contract
- GitHub:** [Deb07-Ops/Decentralised-secure-cloud](https://github.com/Deb07-Ops/Decentralised-secure-cloud)

Machine Learning

A-Secure Warning Platform From Web Attacks Using Machine Learning Techniques 2025

December 2024 - February

- Developed a system that equips users to thoroughly evaluate and rapidly identify the validity of input data, achieving 96% accuracy through Gradient Boosting Classifier Algorithm
- Analyzed and assembled NSDL-KDD dataset with 125,972 entries with 43 features to detect DDos attack and Phishing URL dataset of 10000 entries to detect phishing attacks
- Tech Stack:** Python, HTML/CSS, Flask, Pickle, NumPy, Seaborn, Javascript.
- GitHub:** [Deb07-Ops/Warning-platform-using-ML](https://github.com/Deb07-Ops/Warning-platform-using-ML)

CERTIFICATES

- Certified Ethical Hacker (CEH) - EC-Council (Verify: [ECC7438925160](https://www.eccouncil.org/verify/ECC7438925160)) – Mastered penetration testing
- AWS Solutions Architect Associate (Verify: [Credly](https://www.credly.com/badges/Deb07-Ops/AWS-Solutions-Architect-Associate)) – Designed secure cloud architectures with VPC and IAM.

Extra - Curricular Activities and Achievements

- Hobbies:** Reading Books, Organized VIT Bhopal's Defence club Inauguration event
- Languages:** English, Bengali, Hindi.
